

# Isaacs' game statement of the problem

Game space:

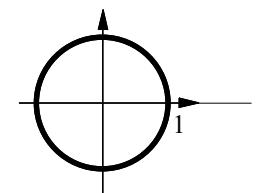

$$N = \{(x, y) \in \mathbb{R}^2 : x \geq 0, y \geq 0\}$$

$$\dot{x} = \sqrt{2gy} u_1 + v_1$$

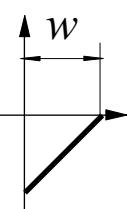

$$\dot{y} = \sqrt{2gy} u_2 + v_2$$

Admissible controls :

$$u = (u_1, u_2) \in P =$$

$$v = (v_1, v_2) \in Q =$$

$$I : t_f \rightarrow \min$$

$$II : t_f \rightarrow \max$$
